

Laryngoscope blades

For single patient use combining safety and strength

Airway Management • Airway Devices

Plastic single use laryngoscope blades

Intersurgical plastic single use laryngoscope blades provide a safe, strong, light and cost-effective alternative to reusable metal versions. The range of Miller and Macintosh blades provides effective illumination and visualisation of the airway to aid with intubation and airway clearance. Our blades are compatible with the ISO7376 green specification handles, as indicated by the green dot near the heel of the blade.

High optical light transmission

Provides the user with an excellent light transfer to the blade tip

Single construction blade made from high impact grade ABS plastic

Rigid blade which is a cost effective, disposable alternative to reusable and disposable metal blades

Engagement to handle click mechanism via two plastic lugs

Provides secure and positive connection of the blade to the handle

Ultra smooth blade with matt finish

Smooth transition into the airway and easy passage of the tube, with no light reflection off the blade
