

Infant and neonatal nasal cannulae
Still soft. Still comfortable.
No phthalates (DEHP).

DEHP-FREE

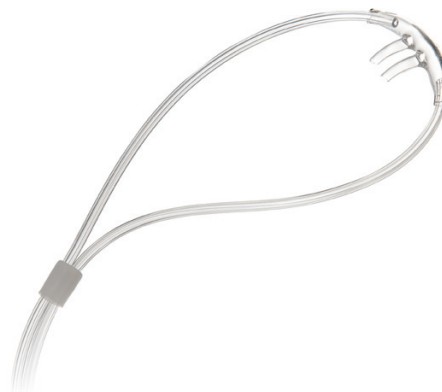

Introducing a new range of phthalate-free (DEHP) neonatal & infant nasal cannulae

“During critical stages of development, fetuses, pre-term babies, and neonates are consistently exposed to DEHP, a reproductive and developmental toxicant. Of particular concern are the multiple and relatively high levels of DEHP exposure that can occur in NICUs”

Report by Health care without harm
