STARMed Ventukit Up openable CPAP hood with Venturi flow driver

StarMed Ventukit Up

Openable Ventukit Up is a complete and easy to use system that is simply activated by connecting to an appropriate oxygen supply. It can be used to deliver CPAP in a hospital environment, transport or pre-hospital use.

The openable Ventukit Up allows for one operator to easily remove the upper part of the hood and have full access to the patient, whilst any probes or catheters can remain in position on the lower part of the hood.

Technical Features

- The integrated Venturi flow driver can generate high patient flows while consuming a reduced amount of compressed oxygen
- O₂% can be adjusted from 40% to 100% at each PEEP level
- The adjustable PEEP valve can provide patient pressures in a range of settings up to 20 cmH₂O
- The user is guided by a performance table integral to the product, for independent PEEP and O₂% settings

Ventukit Up openable CPAP hood with Venturi flow driver, with bi-directional anti-asphyxiation valve and patient access port, inflatable neck cushion and inflation bulb, adjustable PEEP valve, ear plugs and measuring tape

Requirement		Setting	Flow delivered
O ₂ % approx	PEEP cmH ₂ O	Flow O ₂ L/min A + B	Flow approx L/min
40%	5	9 + 0	46
	7.5	9 + 0	47
